Dayton tire plant to close

By Paul Monies
The Oklahoman

Officials with the Nashville, Tennessee-based company say the plant known as the Dayton Tire plant will be closed on or about Dec. 31.

[Bridgestone](#)-Firestone officials had announced in April that they were considering closing the plant but would look for ways to make it more competitive.

Company [Vice President Steve Brooks](#) said today that foreign competition and a shrinking demand for the tires produced at the plant make it virtually impossible for the plant to be competitive and stop losing money.

National Tire And Battery (www.ntb.com) shows the following on their website:

Item	Type	DESCRIPTION	Price

Hankook Tires (www.hankooktireusa.com/)

(made in Korea – good quality)

H714 - 4 Groove

- H, S, & T-Rated
- U.T.Q.G. 380/A/B
- 60/65/70/75/80 Series
- White Sidewall
- Vertical Serrated Band

An all-season performance radial, the H714 is available in 3- or 4-groove designs. The unique tread pattern disperses water to the sides of the tire while the extra-wide grooves enhance wet handling and braking.
